## ABOUT HST

HST was founded by a group of enthusiastic technicians and sales force who have abundant of experience in thermal products and highly motivated to service customers. Our goal in pursuing the best and perfect have made us in continues progress. And striving for professional thermal product supplier with customer-oriented and service-minded has made us become a staunch supplier.

In 2004 , we invested LED lighting company and mainly focus on high power LED Street Lights applications , our products have been qualified by PCT 138 members and SGS , we have provided so many products to lots of countries and some projects are under proceeding now.

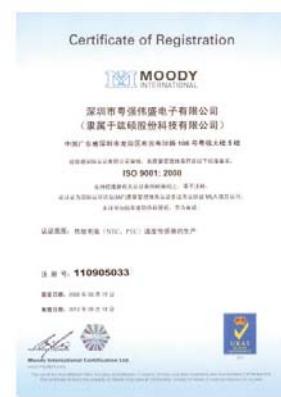

In recent years the various countries competed to invest the massive resources positively to develop the regeneration energy , renewable energy and high efficiency energy industries. Taiwan's superiority will lie in the accumulation rich semiconductor industry technology base, the coordinate economy department subscribes next in 2010 to regenerate the energy electric power facility capacity allocated proportion to reach the total electric power facility capacity 10% goal, the solar cell prospects for development favors.

HST deeply feels "the regeneration energy elementary education" importance . Establishes the photoelectricity department in 2006 and is employed the most long solar energy photoelectricity application specialized company with Taiwan – SOLARI Company signature contract Becomes south solar cell product Taiwan the area specialized business agent .Sell the whole world by the most new style solar energy and the wind power generation using the product.

We take making a contribution to promoting clean and sustainable environment as the one of our long term goals .

## OUR PHILOSOPHY

*Achievement comes from customers' satisfactions.*

## SENSORS INDEX

### NTC THERMISTOR

**Thermistor** is thermally sensitive resistor whose main function is to exhibit a change in electrical resistance with environmental temperature.

Especially, NTC (Negative Temperature Coefficient) thermistor shows the decrease of electric resistance with temperature increase. With high sensitivity and low price, NTC thermistor has variety of application fields such as home electronics, automobile, telecommunication, computer, medical field and other industrial usage.

### Zero-power resistance ( $R_T$ )

The zero-power resistance is the value of a resistance when measured at a specified temperature, under conditions such that the change in resistance due to the internal generation of heat is negligible with respect to the total error of measurement.

### B-value

An index of the thermal sensitivity expressed by the formula:

$$\beta_{T_a / T_0} = \frac{\ln(R_{T_a} / R_{T_0})}{\frac{1}{T_a} - \frac{1}{T_0}}$$

Where

B: constant in Kelvins (K)

$R_0$ : resistance in ohms ( $\Omega$ ) at temperature  $T_0$

$R_a$ : resistance in ohms ( $\Omega$ ) at temperature  $T_a$

$$T(K) = 273.15 + T(^\circ C)$$

The value given above for  $T_0$  and  $T_a$  are the preferred values. When the detail specification prescribes that the B-value shall be measured at other temperatures, the specified value (in Kelvins) shall be used for  $T_0$  and  $T_a$  in place of the preferred values.

### Dissipation constant ( $\delta$ )

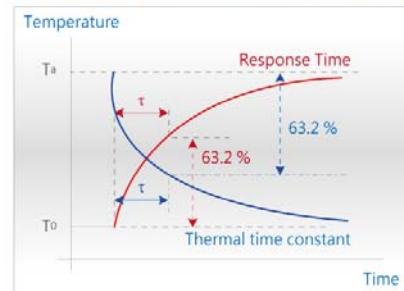

The dissipation constant is the quotient (in W/K), at a specified ambient temperature in specified medium of a change in power dissipation in a thermistor to the resultant body temperature change.

$$\delta = P / (T_2 - T_1)$$

where  $P$ ,  $T_2$ , and  $T_1$  are the dissipated power, thermistor temperature, and ambient temperature respectively.

### Response time / Thermal time constant ( $\tau$ )

The time (in s) means the time necessary for an unloaded thermistor to vary its temperature by 63.2% of the difference between its temperature and the ambient temperature. The values of  $T_\tau$  specified in this article, is determined in oil at an ambient temperature of 25°C.

Code	Rate of charging (%) for $T_0-T_a$
$\tau$	63.2
$2\tau$	86.5
$3\tau$	95.0
$4\tau$	98.2
$5\tau$	99.4
$6\tau$	99.8
$7\tau$	99.9

### Maximum power rating

The power rating is the maximum power for a continuous load at the rated temperature. For parts in this catalog, the value is calculated from the following using  $T_a$ °C as the ambient temperature.

$$P_{max.} = \delta (T_{max.} - T_a)$$

### HOW TO MEASURE NTC THERMISTORS

The published RT-values are measured at the temperature  $T$ .

The published B-value at 25°C is the result of the measurement at 25°C and that at 85°C. Hence, these values should be used when checking.

The following general precautions have to be taken when measuring NTC thermistors:

\* Never measure thermistors in air; this is quite inaccurate and gives deviations of 1 or 2K. For measurements at room temperature or below, use petrol or some other non-conductive and non-aggressive fluid. For higher temperatures use oil, preferably silicon oil.

\* Use a thermobath with an accuracy of better than 0.1°C. Even if the fluid is well stirred, there is still a temperature gradient in the fluid. Measure the temperature as close as possible to the NTC.

\* After placing the NTC in the thermobath, wait until temperature equilibrium between the NTC and the fluid is obtained. For some types this may take more than 1 minute.

\* Keep the measuring voltage as low as possible, otherwise the NTC will be heated by the measuring current.

Miniature NTC thermistors are especially sensitive in this respect. Measuring voltages of less than 0.5V are recommended.

\* For high temperature measurements it is recommended that stem correction be applied to the thermometer reading.

## HOUSEHOLD APPLICATION

HIGH PERFORMANCE

## NTC SENSORS

The Temperature sensor is assembled one with various parts and thermistor devices according to the required applications. Its electric characteristics are the same as those of thermistor devices. Variable type of sensor can be utilized for detecting or controlling temperature because its operating temperature range is wide from -50 to +300C. Standard temperature sensor is available in accordance with the applications such as measurements of liquid, atmosphere and surface temperature.

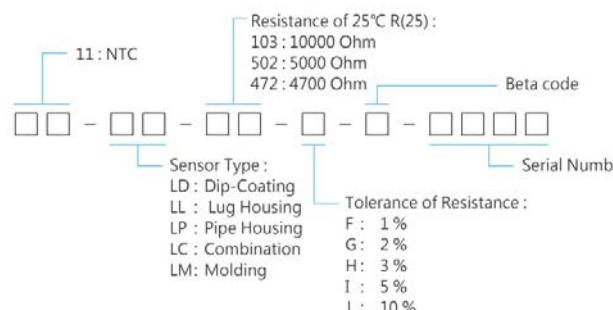

Product No. : 11L

Description :

- High stability, high accuracy and high reliability.
- Provide a flexible design of any kind of sensor.
- Resistance at 25°C : 2K ~ 100K ohms
- Resistance tolerance : ±1%, ±2%, ±3%, ±5%

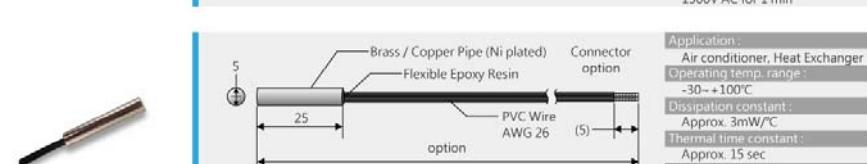

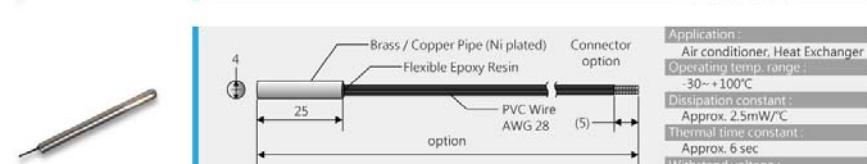

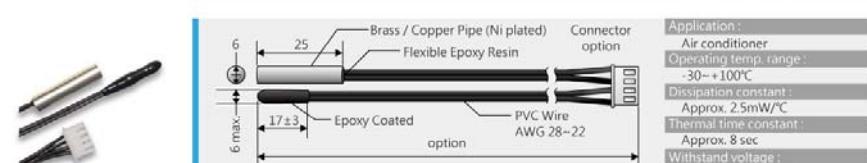

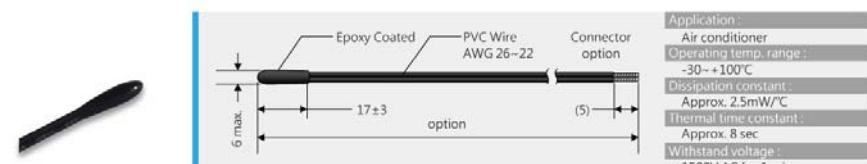

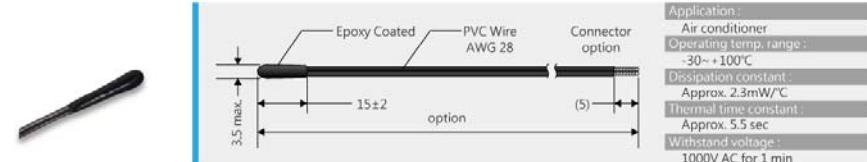

### NTC Sensors Coding System

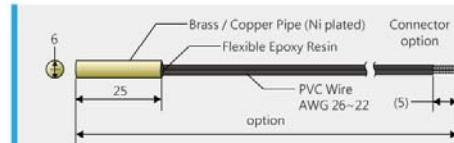

## APPLICATION

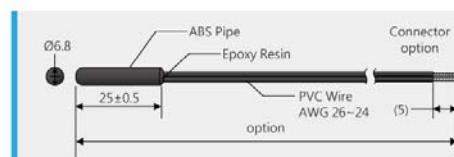

*Air-Conditioner*

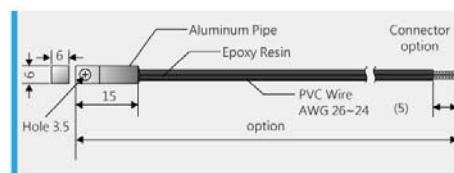

**Air-Conditioner**

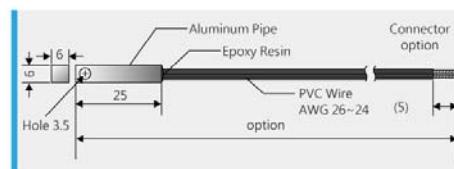

**Application :**  
Air conditioner, Heat Exchanger  
**Operating temp. range :**  
-30~+100°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 15 sec  
**Withstand voltage :**  
1800V AC for 1 min

**Application :**  
Air conditioner  
**Operating temp. range :**  
-40~+80°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 25 sec  
**Withstand voltage :**  
1800V AC for 1 min

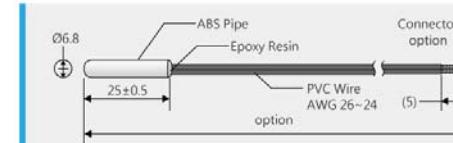

**Application :**  
Air conditioner  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 16 sec  
**Withstand voltage :**  
1800V AC for 1 min

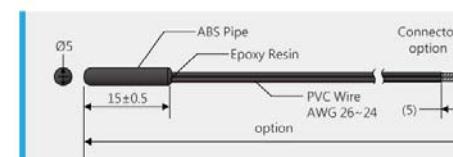

**Application :**  
Air conditioner  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 16 sec  
**Withstand voltage :**  
1800V AC for 1 min

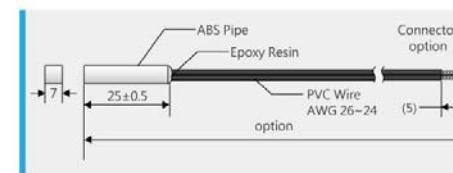

**Application :**  
Water box of Air Conditioner  
**Operating temp. range :**  
-30~+80°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
600V AC for 1 min

**Refrigerator/Chiller**

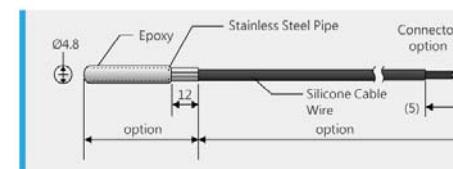

**Application :**  
Refrigerator  
**Operating temp. range :**  
-40~+80°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 25 sec  
**Withstand voltage :**  
1800V AC for 1 min

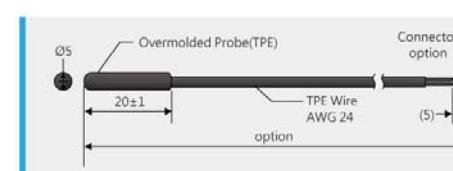

**Application :**  
Refrigerator  
**Operating temp. range :**  
-40~+80°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 25 sec  
**Withstand voltage :**  
1800V AC for 1 min

**Application :**  
Refrigerator  
**Operating temp. range :**  
-40~+80°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 25 sec  
**Withstand voltage :**  
1800V AC for 1 min

**Application :**  
Refrigerator  
**Operating temp. range :**  
-40~+80°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 25 sec  
**Withstand voltage :**  
1800V AC for 1 min

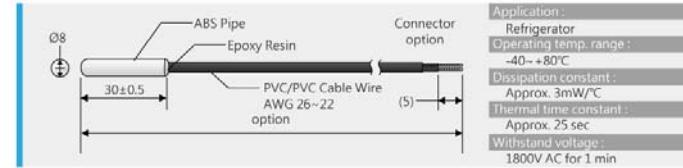

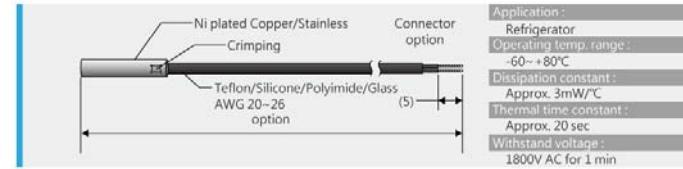

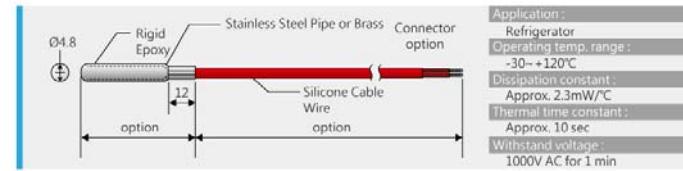

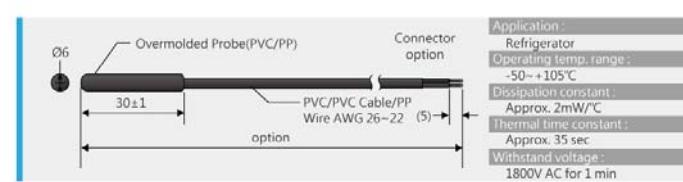

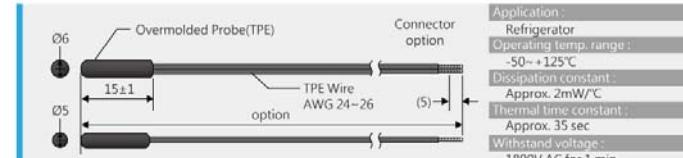

**Application :**  
Refrigerator  
**Operating temp. range :**  
-40~+80°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 35 sec  
**Withstand voltage :**  
1800V AC for 1 min

### Dehumidifier

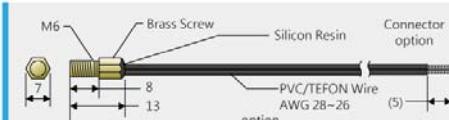

**Coffee maker & Boiler**

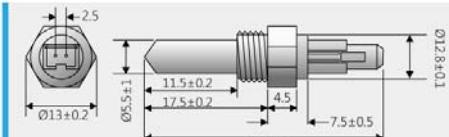

**Application :**  
Boiler, Hot Water Supplier  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2mW/C  
**Thermal time constant :**  
Approx. 1 sec  
**Withstand voltage :**  
600V AC for 1 min

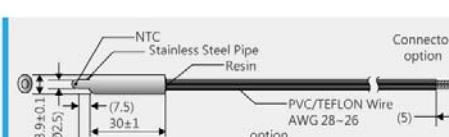

**Application :**  
Boiler, Hot water system  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 5 sec  
**Withstand voltage :**  
1000V AC for 1 min

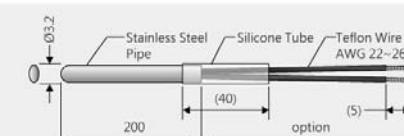

**Application :**  
Coffee Maker  
**Operating temp. range :**  
-30~+200°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 12 sec  
**Withstand voltage :**  
1000V AC for 1 min

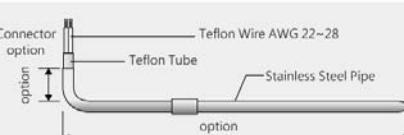

**Application :**  
Boiler, Hot water system  
**Operating temp. range :**  
-30~+85°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 15 sec  
**Withstand voltage :**  
1500V AC for 1 min

**Application :**  
Boiler, Hot Water Supplier  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2mW/C  
**Thermal time constant :**  
Approx. 3 sec  
**Withstand voltage :**  
600V AC for 1 min

**Fryer**

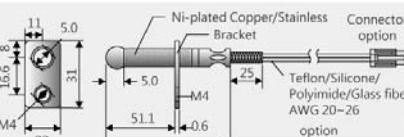

**Application :**  
Cooking Thermometers  
**Operating temp. range :**  
-30~+260°C  
**Dissipation constant :**  
Approx. 2mW/C  
**Thermal time constant :**  
Approx. 5 sec  
**Withstand voltage :**  
1000V AC for 1 min

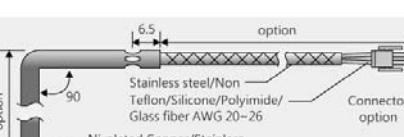

**Application :**  
Fryer  
**Operating temp. range :**  
-30~+220°C  
**Dissipation constant :**  
Approx. 2.5mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
1000V AC for 1 min

**Application :**  
Fryer  
**Operating temp. range :**  
-30~+220°C  
**Dissipation constant :**  
Approx. 2.2mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
1000V AC for 1 min

**Application :**  
Fryer  
**Operating temp. range :**  
-30~+260°C  
**Dissipation constant :**  
Approx. 2.2mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
1000V AC for 1 min

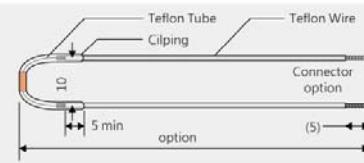

**Application :**  
Fryer  
**Operating temp. range :**  
-30~+260°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
1000V AC for 1 min

### Microwave oven/Oven

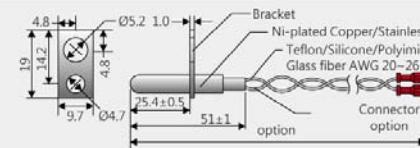

**Application :**  
Home Baker , Rice Cooker  
**Operating temp. range :**  
-30~ +260°C  
**Dissipation constant :**  
Approx. 2.5mW/C  
**Thermal time constant :**  
Approx. 5 sec  
**Withstand voltage :**  
1000V AC for 1 min

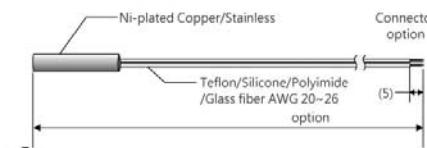

**Application :**  
Home Baker , Microwave oven  
**Operating temp. range :**  
-30~ +260°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
1000V AC for 1 min

**Application :**  
Home Baker , Microwave oven  
**Operating temp. range :**  
-30~ +260°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
1000V AC for 1 min

**Application :**  
Home Baker , Microwave oven  
**Operating temp. range :**  
-30~ +260°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
1000V AC for 1 min

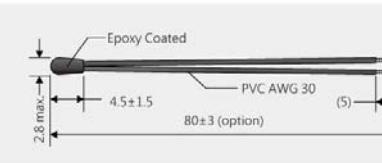

**Application :**  
Home Baker , Microwave oven  
**Operating temp. range :**  
-30~ +260°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
1000V AC for 1 min

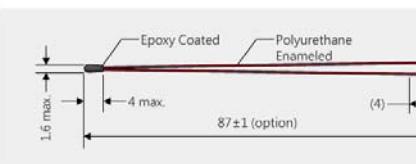

## HIGH PERFORMANCE

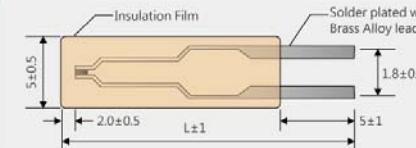

### Notebook Battery Pack

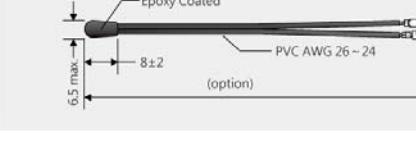

**Application :**  
Battery Pack  
**Operating temp. range :**  
-30~ +80°C  
**Dissipation constant :**  
Approx. 1.3mW/C  
**Thermal time constant :**  
Approx. 2.5 sec  
**Withstand voltage :**  
500V AC for 1 min

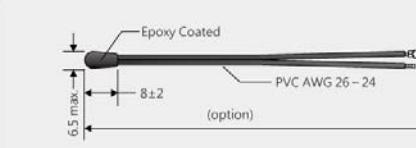

**Application :**  
Battery Pack , Thermometers  
**Operating temp. range :**  
-30~ +120°C  
**Dissipation constant :**  
Approx. 0.7mW/C  
**Thermal time constant :**  
Approx. 0.8 sec  
**Withstand voltage :**  
> 50MW<sub>0</sub> / 500V DC

**Application :**  
Battery Pack  
**Operating temp. range :**  
-30~ +120°C  
**Dissipation constant :**  
Approx. 0.7mW/C  
**Thermal time constant :**  
Approx. 10 sec  
**Withstand voltage :**  
500V DC

**Application :**  
Battery Pack  
**Operating temp. range :**  
-30~ +80°C  
**Dissipation constant :**  
Approx. 1.3mW/C  
**Thermal time constant :**  
Approx. 2.5 sec  
**Withstand voltage :**  
500V AC for 1 min

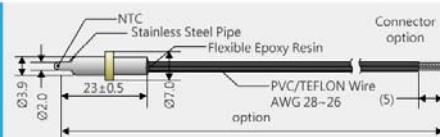

**Application :**  
Battery Pack  
**Operating temp. range :**  
-30~ +80°C  
**Dissipation constant :**  
Approx. 1.3mW/C  
**Thermal time constant :**  
Approx. 2.5 sec  
**Withstand voltage :**  
500V AC for 1 min

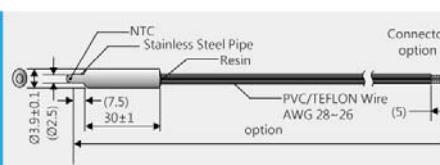

## HIGH QUALITY

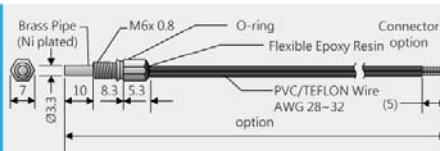

### Hot water supplier/Boiler

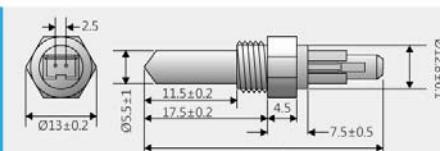

**Application :**  
Boiler, Hot Water Supplier  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2mW/C  
**Thermal time constant :**  
Approx. 1 sec  
**Withstand voltage :**  
600V AC for 1 min

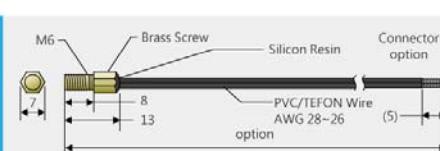

**Application :**  
Boiler, Hot Water Supplier  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2mW/C  
**Thermal time constant :**  
Approx. 3 sec  
**Withstand voltage :**  
600V AC for 1 min

**Application :**  
Hot Water System  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 5 sec  
**Withstand voltage :**  
1000V AC for 1 min

**Application :**  
Boiler, Hot water system  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 15 sec  
**Withstand voltage :**  
1500V AC for 1 min

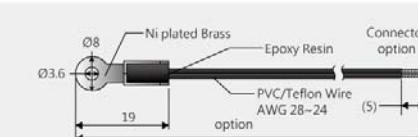

**Application :**  
Boiler, Hot water system  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 3mW/C  
**Thermal time constant :**  
Approx. 5 sec  
**Withstand voltage :**  
1000V AC for 1 min

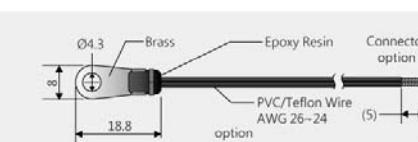

## HIGH PERFORMANCE

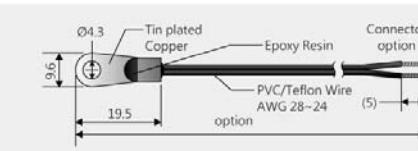

### Power supply/Heater

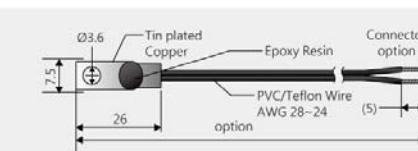

**Application :**  
Heater, Power  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/C  
**Thermal time constant :**  
Approx. 8 sec  
**Withstand voltage :**  
1500V AC for 1 min

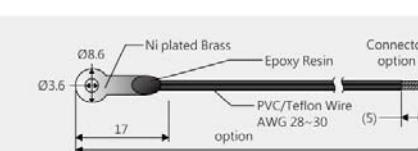

**Application :**  
Heater, Power  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/C  
**Thermal time constant :**  
Approx. 8 sec  
**Withstand voltage :**  
1500V AC for 1 min

**Application :**  
Heater, Power  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/C  
**Thermal time constant :**  
Approx. 8 sec  
**Withstand voltage :**  
1500V AC for 1 min

**Application :**  
Heater, Power  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/C  
**Thermal time constant :**  
Approx. 8 sec  
**Withstand voltage :**  
1500V AC for 1 min

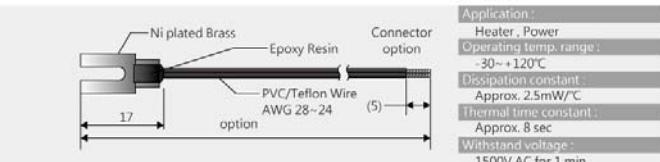

**Application :**  
Heater, Power  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/C  
**Thermal time constant :**  
Approx. 8 sec  
**Withstand voltage :**  
1500V AC for 1 min

### Power supply/Heater

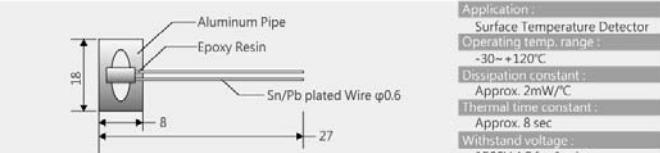

**Application :**  
Heater, Power  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/°C  
**Thermal time constant :**  
Approx. 8 sec  
**Withstand voltage :**  
1500V AC for 1 min

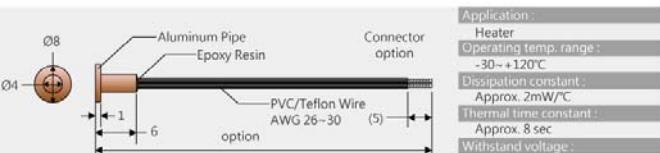

**Application :**  
Heater, Power  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/°C  
**Thermal time constant :**  
Approx. 12 sec  
**Withstand voltage :**  
1500V AC for 1 min

**Application :**  
Heater, Power  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/°C  
**Thermal time constant :**  
Approx. 18 sec  
**Withstand voltage :**  
1800V AC for 1 min

**Application :**  
Surface Temperature Detector  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2mW/°C  
**Thermal time constant :**  
Approx. 8 sec  
**Withstand voltage :**  
1500V AC for 1 min

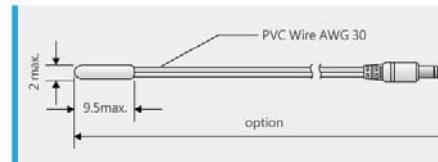

**Application :**  
Heater  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2mW/°C  
**Thermal time constant :**  
Approx. 8 sec  
**Withstand voltage :**  
1500V AC for 1 min

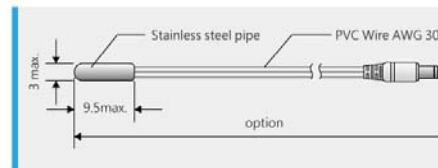

## HIGH PERFORMANCE

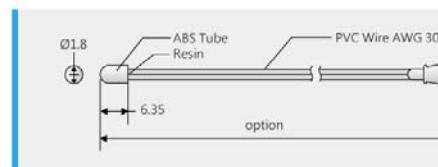

### Medicine

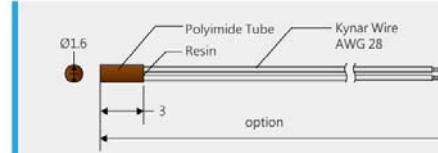

**Application :**  
Medicine  
**Operating temp. range :**  
-30~+80°C  
**Dissipation constant :**  
Approx. 1.5mW/°C  
**Thermal time constant :**  
Approx. 2 sec  
**Withstand voltage :**  
1000V AC for 1 min

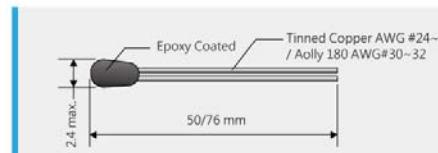

**Application :**  
Medicine  
**Operating temp. range :**  
-30~+80°C  
**Dissipation constant :**  
Approx. 1.5mW/°C  
**Thermal time constant :**  
Approx. 2 sec  
**Withstand voltage :**  
1000V AC for 1 min

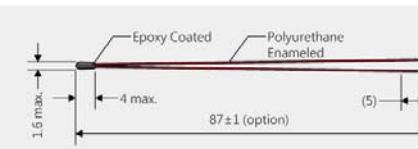

**Application :**  
Medicine  
**Operating temp. range :**  
-50~+150°C  
**Dissipation constant :**  
Approx. 2.5mW/°C  
**Thermal time constant :**  
Approx. 1.25 sec  
**Withstand voltage :**  
> 50MW $\Omega$  / 500V DC

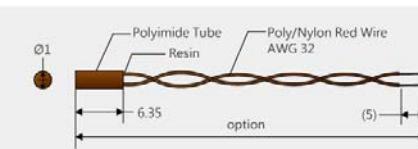

**Application :**  
Medicine  
**Operating temp. range :**  
-50~+150°C  
**Dissipation constant :**  
Approx. 1.5mW/°C  
**Thermal time constant :**  
Approx. 0.4 sec  
**Withstand voltage :**  
> 50MW $\Omega$  / 500V DC

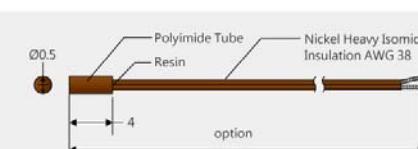

**Application :**  
Medicine  
**Operating temp. range :**  
-50~+150°C  
**Dissipation constant :**  
Approx. 2.0mW/°C  
**Thermal time constant :**  
Approx. 0.75 sec  
**Withstand voltage :**  
> 50MW $\Omega$  / 500V DC

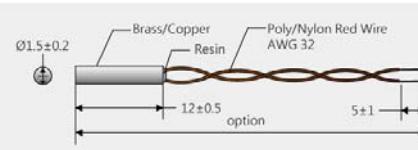

**Application :**  
Medical Equipment , Thermometers  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 0.7mW/°C  
**Thermal time constant :**  
Approx. 0.8 sec  
**Withstand voltage :**  
> 50MWΩ / 500V DC

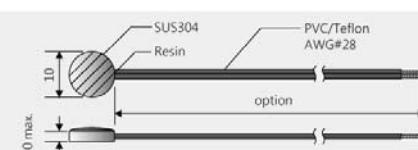

**Application :**  
Medicine  
**Operating temp. range :**  
-50~+150°C  
**Dissipation constant :**  
Approx. 1.5mW/°C  
**Thermal time constant :**  
Approx. 0.4 sec  
**Withstand voltage :**  
> 50MWΩ / 500V DC

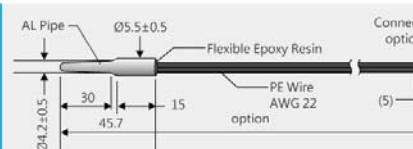

**Application :**  
Medicine  
**Operating temp. range :**  
-50~+150°C  
**Dissipation constant :**  
Approx. 1.5mW/°C  
**Thermal time constant :**  
Approx. 0.4 sec  
**Withstand voltage :**  
> 50MWΩ / 500V DC

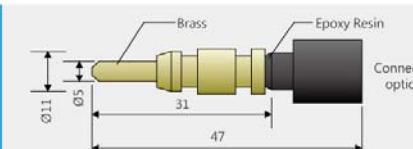

**Application :**  
Medicine  
**Operating temp. range :**  
-50~+150°C  
**Dissipation constant :**  
Approx. 1.5mW/°C  
**Thermal time constant :**  
Approx. 2 sec  
**Withstand voltage :**  
> 50MWΩ / 500V DC

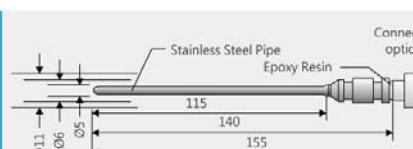

**Application :**  
Medicine  
**Operating temp. range :**  
-50~+150°C  
**Dissipation constant :**  
Approx. 1.5mW/°C  
**Thermal time constant :**  
Approx. 2 sec  
**Withstand voltage :**  
> 50MWΩ / 500V DC

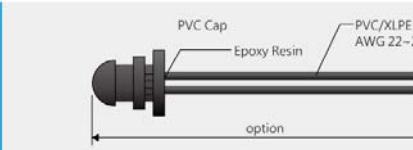

**Application :**  
Intake air  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2mW/°C  
**Thermal time constant :**  
Approx. 5 sec  
**Withstand voltage :**  
1500V AC for 1 min

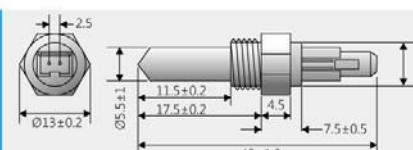

**Application :**  
Water temp.  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 2.5mW/°C  
**Thermal time constant :**  
Approx. 9 sec  
**Withstand voltage :**  
1500V AC for 1 min

**Application :**  
Water temp.  
**Operating temp. range :**  
-30~+120°C  
**Dissipation constant :**  
Approx. 3mW/°C  
**Thermal time constant :**  
Approx. 15 sec  
**Withstand voltage :**  
1500V AC for 1 min

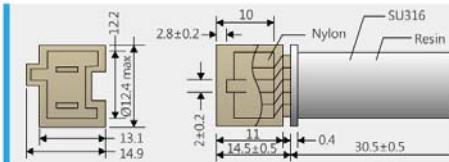

**Application :**  
Water temp.  
**Operating temp. range :**  
-30~+150°C  
**Dissipation constant :**  
Approx. 3mW/°C  
**Thermal time constant :**  
Approx. 15 sec  
**Withstand voltage :**  
1500V AC for 1 min

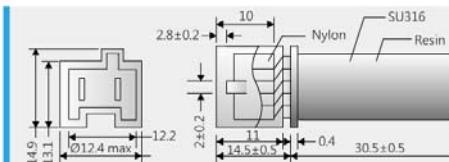

**Application :**  
Water temp.  
**Operating temp. range :**  
-30~+150°C  
**Dissipation constant :**  
Approx. 3mW/°C  
**Thermal time constant :**  
Approx. 15 sec  
**Withstand voltage :**  
1500V AC for 1 min

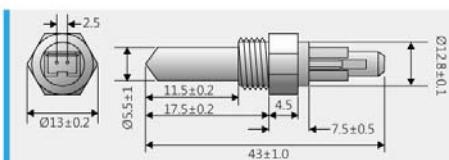

## HIGH QUALITY

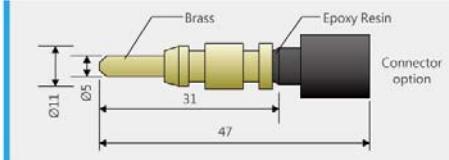

**Application:**  
Washer  
**Operating temp. range:**  
-40~+125°C  
**Dissipation constant:**  
Approx. 30mW/C  
**Thermal time constant:**  
Approx. 18sec  
**Withstand voltage:**  
1000V AC for 1 min

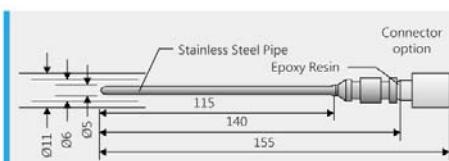

**Application:**  
Washer  
**Operating temp. range:**  
-40~+125°C  
**Dissipation constant:**  
Approx. 30mW/C  
**Thermal time constant:**  
Approx. 18 sec  
**Withstand voltage:**  
1000V AC for 1 min

**Application:**  
Washer  
**Operating temp. range:**  
-30~+150°C  
**Dissipation constant:**  
Approx. 3mW/C  
**Thermal time constant:**  
Approx. 15 sec  
**Withstand voltage:**  
1500V AC for 1 min

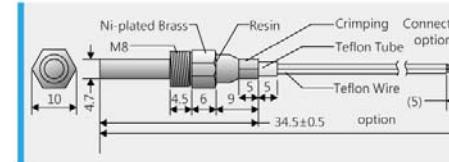

**Application:**  
Washer  
**Operating temp. range:**  
-30~+120°C  
**Dissipation constant:**  
Approx. 2.5mW/C  
**Thermal time constant:**  
Approx. 9 sec  
**Withstand voltage:**  
1500V AC for 1 min

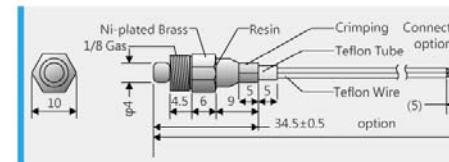

**Application:**  
Washer  
**Operating temp. range:**  
-30~+120°C  
**Dissipation constant:**  
Approx. 3mW/C  
**Thermal time constant:**  
Approx. 15 sec  
**Withstand voltage:**  
1500V AC for 1 min

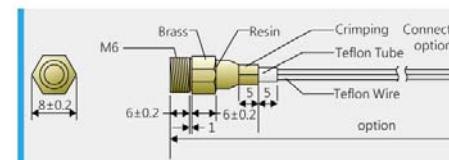

## HIGH PERFORMANCE

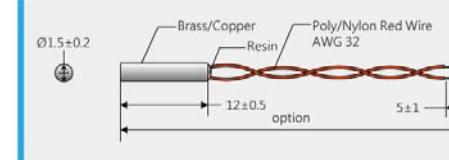

**Application:**  
Industry  
**Operating temp. range:**  
-30~+250°C  
**Dissipation constant:**  
Approx. 2mW/C  
**Thermal time constant:**  
Approx. 10 sec  
**Withstand voltage:**  
1500V AC for 1 min

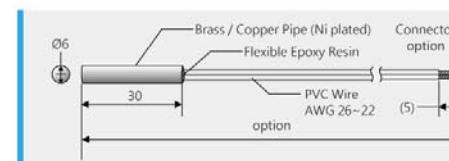

**Application:**  
Industry  
**Operating temp. range:**  
-30~+250°C  
**Dissipation constant:**  
Approx. 2mW/C  
**Thermal time constant:**  
Approx. 10 sec  
**Withstand voltage:**  
1500V AC for 1 min

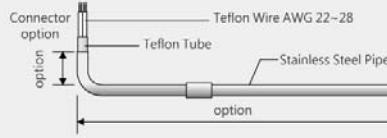

**Application:**  
Industry  
**Operating temp. range:**  
-30~+250°C  
**Dissipation constant:**  
Approx. 2mW/C  
**Thermal time constant:**  
Approx. 10 sec  
**Withstand voltage:**  
1500V AC for 1 min

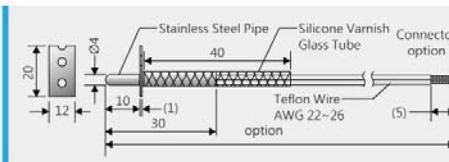

**Application:**  
Industry  
**Operating temp. range:**  
-30~+150°C  
**Dissipation constant:**  
Approx. 1.5mW/C  
**Thermal time constant:**  
Approx. 2 sec  
**Withstand voltage:**  
500V AC for 1 min

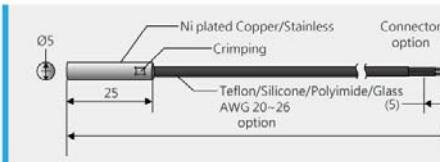

**Application:**  
Industry  
**Operating temp. range:**  
-30~+100°C  
**Dissipation constant:**  
Approx. 3mW/C  
**Thermal time constant:**  
Approx. 15 sec  
**Withstand voltage:**  
1800V AC for 1 min

**Industry**

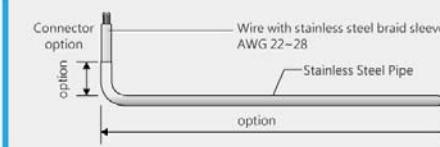

**Application :**  
Industry  
**Operating temp. range :** -30~+220°C  
**Dissipation constant :** Approx. 2.5mW/°C  
**Thermal time constant :** Approx. 10 sec  
**Withstand voltage :** 1000V AC for 1 min

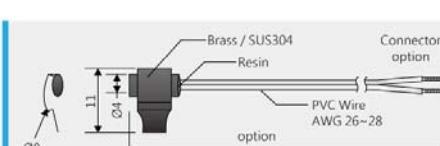

**Application :**  
Industry  
**Operating temp. range :** -30~+260°C  
**Dissipation constant :** Approx. 3mW/°C  
**Thermal time constant :** Approx. 10 sec  
**Withstand voltage :** 1000V AC for 1 min

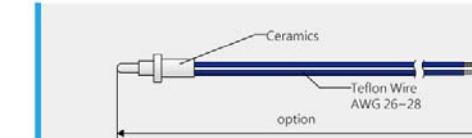

**Application :**  
Industry  
**Operating temp. range :** -60~+80°C  
**Dissipation constant :** Approx. 3mW/°C  
**Thermal time constant :** Approx. 20 sec  
**Withstand voltage :** 1800V AC for 1 min

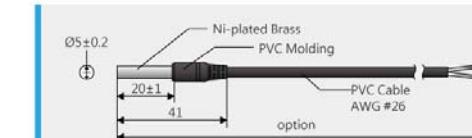

**Application :**  
Industry  
**Operating temp. range :** -30~+220°C  
**Dissipation constant :** Approx. 2.2mW/°C  
**Thermal time constant :** Approx. 10 sec  
**Withstand voltage :** 1000V AC for 1 min

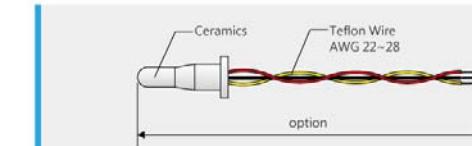

**Application :**  
Industry  
**Operating temp. range :** -30~+105°C  
**Dissipation constant :** Approx. 2.2mW/°C  
**Thermal time constant :** Approx. 10 sec  
**Withstand voltage :** 1500V AC for 1 min

**Industry**

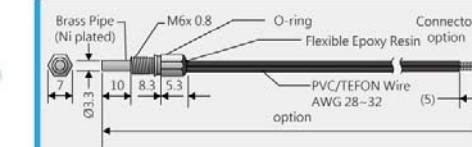

**Application :**  
Industry  
**Operating temp. range :** -30~+250°C  
**Dissipation constant :** Approx. 2mW/°C  
**Thermal time constant :** Approx. 10 sec  
**Withstand voltage :** 1500V AC for 1 min

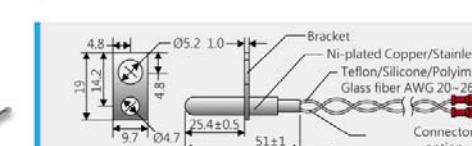

**Application :**  
Industry  
**Operating temp. range :** -30~+250°C  
**Dissipation constant :** Approx. 2mW/°C  
**Thermal time constant :** Approx. 10 sec  
**Withstand voltage :** 1500V AC for 1 min

**Application :**  
Industry  
**Operating temp. range :** -30~+250°C  
**Dissipation constant :** Approx. 2mW/°C  
**Thermal time constant :** Approx. 10 sec  
**Withstand voltage :** 1500V AC for 1 min

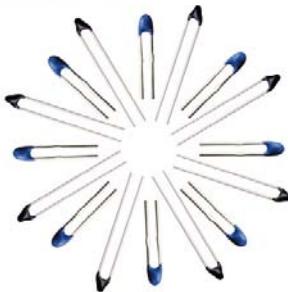

**Application :**  
Industry  
**Operating temp. range :** -30~+120°C  
**Dissipation constant :** Approx. 3mW/°C  
**Thermal time constant :** Approx. 5 sec  
**Withstand voltage :** 1000V AC for 1 min

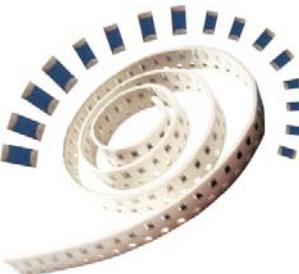

**Application :**  
Industry  
**Operating temp. range :** -30~+260°C  
**Dissipation constant :** Approx. 3mW/°C  
**Thermal time constant :** Approx. 10 sec  
**Withstand voltage :** 1000V AC for 1 min

**HIGH QUALITY****NTC THERMISTORS**

## Radial series

## SMD series

## Thin-Film series

Product No.: 11R

## Description :

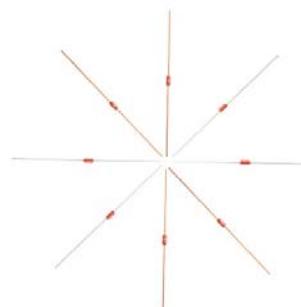

- Small precision type
- Excellent thermal cycle endurance
- Rapid time response quality
- Resistance Tolerance :  $\pm 1 \sim \pm 3\%$
- Operation Temperature Range : -30 ~ +120 °C

**HIGH PERFORMANCE**

## Interchangeable series

## Glass Encapsulated series

Product No.: 11LDIN

## Description :

- High accuracy tolerances from  $\pm 1^\circ\text{C}$  to  $\pm 0.1^\circ\text{C}$
- Operating ranges from -50°C to 150°C
- Small size
- Proprietary processes provide top of the line with high quality and stability
- RoHS Compliance

Product No.: 11G

The 11G0200 series thermistor is a thermal sensor in a DO35 package. It is highly reliable and offers a wide operating range of -50 °C to 250 °C. They can be employed for home electric appliances and high temperature applications.

Product No.: 11GP

The 11GP series thermistor (Shibaura NTC thermistors) provides high stability thanks to the fine ceramic chip. The automated production process refined through Shibaura's years of experience provide uniform shape and characteristics--as well as high cost performance. The glass seal provides high heat resistance and moisture tightness, while the small size provides fast response times

## RADIAL SERIES

### Characteristics

- Thermal Time Constant  $\leq 12$  sec.
- Thermal Dissipation Constant  $\leq 3$  mW/°C
- Operation Temperature Range  $-30 \sim +120$  °C

### Part Number System

11-R-0100-103-H-H-J001

① ② ③ ④ ⑤ ⑥ ⑦

- Product Name: NTC Thermistor
- Product Identifier: Radial Type
- Dimensions:
  - 0100 : Chip Size , 0300 : 3mm Disc Size
  - 0500 : 5mm Disc Size
- Resistance at 25°C:  $103 = 10 \times 10^3$  Ω
- Resistance Tolerance:
  - F: ±1%, G: ±2%, H: ±3%, J: 5%, K: 10%
- Beta Code
- Special Code

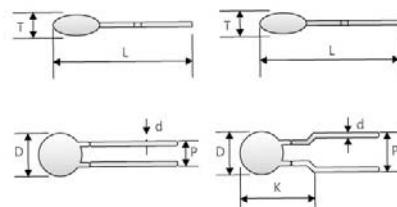

### Features

- Small precision type
- Excellent thermal cycle endurance
- Rapid time response quality

### Applications

- Temperature detection for mother boards
- Temperature-humidity clock
- Notebook computer's battery chargers

## SMD SERIES

### Characteristics

- Resistance Tolerance  $\pm 1 \sim \pm 10\%$
- B Constant Tolerance  $\pm 3\%$
- Thermal Time Constant  $\approx 8$  sec.
- Operation Temperature Range  $-40 \sim +125^\circ\text{C}$
- Thermal Dissipation Constant  $\approx 1.0 \text{ mW}/^\circ\text{C}$
- Max. Rated Power at  $25^\circ\text{C} \approx 5\text{mW}$

### Part Number System

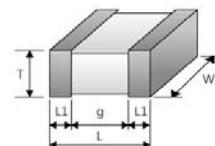

11 - S - 0805 - 103 - K - C  
 ① ② ③ ④ ⑤ ⑥

- Product Name: NTC Thermistor
  - Product Identifier: Surface Mount
  - Dimensions:
  - Resistance at  $25^\circ\text{C}$ :  $103 = 10 * 10^3 \Omega$
  - Resistance Tolerance:
  - F:  $\pm 1\%$ , H:  $\pm 3\%$ , J:  $\pm 5\%$ , K:  $\pm 10\%$
- Beta Code

### Features

- Ultra small size, low capacitor
- Glass coated ceramics for long term reliability
- Good solderability
- Non polarized for mounting

## THIN-FILM SERIES

The TF thermistor feature ultra thinness of 500μm and superior electrical insulation. This thermistor can be used to provide safety in applications where mounting could contact electrodes.

### Characteristics

- Resistance Tolerance  $\pm 1 \sim \pm 5\%$
- B Constant Tolerance  $\pm 1\%$
- Thermal Dissipation Constant  $\approx 0.7\text{ mW}/^\circ\text{C}$  in still air
- Thermal Time Constant  $\approx 2.0\text{ sec.}$  in air
- Operation Temperature Range  $-50 \sim +90^\circ\text{C}$

### Part Number System

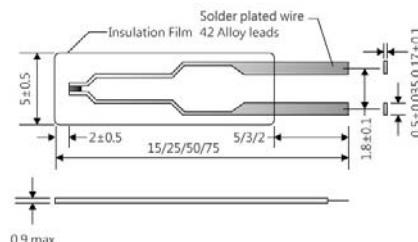

11 - F - 0525 - 103 - F - C - 15  
 ① ② ③ ④ ⑤ ⑥ ⑦ ⑧

- Product Name: NTC Thermistor
- Product Identifier: Thin-Film
- Dimensions:  
0515:5\*15 mm, 0525:5\*25 mm  
0550:5\*50 mm, 0575:5\*75 mm
- Resistance at  $25^\circ\text{C}$ :  $103 = 10 \times 10^3\ \Omega$
- Resistance Tolerance:  
 $F: \pm 1\%$ ,  $H: \pm 3\%$ ,  $J: \pm 5\%$
- Beta Code:  
C: 3435  
L: 4262
- Others:  
X: 5: 5mm, 3: 2.5mm, 2: 2mm  
Y: 0: Halogen-Free, 1: Normal

### Features

- Suitable for narrow space
- Rapid response time
- Elastic and solder easily
- RoHS Compliance
- UL1434 Certification

## INTERCHANGEABLE SERIES

Interchangeable refers to how accurately thermistors guarantee (R/T) curve over a range of temperatures. This allows every thermistor to be interchangeable with every other thermistor of the same series specifications without re-calibration of instrumentation.

### Characteristics

- Resistance Tolerance  $\pm 0.1 \sim \pm 1.0\ ^\circ\text{C}$
- Thermal Dissipation Constant  $\approx 2.0\text{ mW}/^\circ\text{C}$  in still air  
 $\approx 13\text{ mW}/^\circ\text{C}$  in stirred oil
- Thermal Time Constant  $\approx 0.75\text{ sec.}$  in stirred oil
- Operation Temperature Range  $-50 \sim +150^\circ\text{C}$

### Part Number System

## GLASS ENCAPSULATED SERIES

The glass encapsulated thermistors are manufactured using super stable NTC chips which are hermetically sealed in a glass (DO-35 diode or bead type) package .The result is a device which exhibits excellent long term reliability and stability even when subjected to severe environmental or thermal condition.

### Characteristics

- Resistance Tolerance  $\pm 2 \sim \pm 10\%$
- B Constant Tolerance  $\pm 2 \sim \pm 3\%$
- Thermal Dissipation Constant  $\approx 2.3 \text{ mW/}^\circ\text{C}$
- Thermal Time Constant  $\approx 5 \text{ sec.}$
- Operation Temperature Range  $-50 \sim +250 \text{ }^\circ\text{C}$

### Part Number System

## PT SENSOR ( RTD SENSOR )

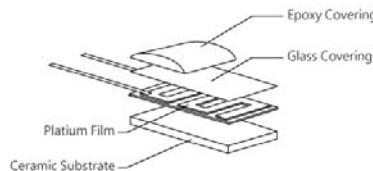

Resistance Temperature Detectors (RTD), as the name implies, are sensors used to measure temperature by correlating the resistance of the RTD element with temperature. Most RTD elements consist of a length of fine coiled wire wrapped around a ceramic or glass core. The element is usually quite fragile, so it is often placed inside a sheathed probe to protect it. The RTD element is made from a pure material whose resistance at various temperatures has been documented. The material has a predictable change in resistance as the temperature changes; it is this predictable change that is used to determine temperature.

The RTD is one of the most accurate temperature sensors. Not only does it provide good accuracy, it also provides excellent stability and repeatability.

RTDs are also relatively immune to electrical noise and therefore well suited for temperature measurement in industrial environments, especially around motors, generators and other high voltage equipment.

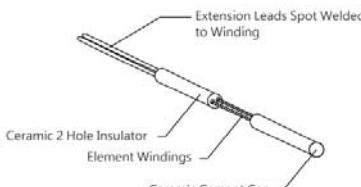

RTD's are manufactured in 3 basic types of construction. Each of these different types has advantages and disadvantages.

### Platinum Thin Film Element

The thin film style of RTD is probably the most popular design because of their rugged design and low cost. The thin film element is manufactured by coating a small ceramic chip with a very thin (.0001") film of platinum and then laser cutting or chemical etching a resistance path in the platinum film. The element is then coated with a thin layer of glass to protect it from harmful chemicals and gases. Larger extension lead wires are spot welded to the chip and this junction is then covered with a drop of epoxy to help hold the wires to the element.

### Inner Coil Wire Wound Element

This type of element is normally manufactured using platinum wire. Very small platinum wire (.0002") is coiled and then slid into a small 2 hole ceramic insulator. Larger extension leads are then spot welded to the ends of the platinum wire and cemented in place. Some manufacturers backfill the bores of the insulator with ceramic powder once the coils have been inserted.

This keeps the coils from moving and shorting against each other. The end opposite the extension leads is capped with ceramic cement also.

### Outer Wire Wound Element

The outer wound RTD element is made by winding the sensing element wire around a center mandrel, which is usually made of ceramic. This winding is then coated with glass or some other insulating material to protect and secure the windings. The winding wires are then spot welded to extension leads and secured to the body with ceramic cement or epoxy.

### Characteristic

The characteristic temperature curve determines the dependence of the electrical resistivity on the temperature. The following definition of the temperature curve according to the IEC 60751/ DIN EN 60751 standard applies: for the temperature range of -55°C up to 0°C:

$$R_T = R_0 \times [1 + A T + B T^2 + C (T - 100) T^3]$$

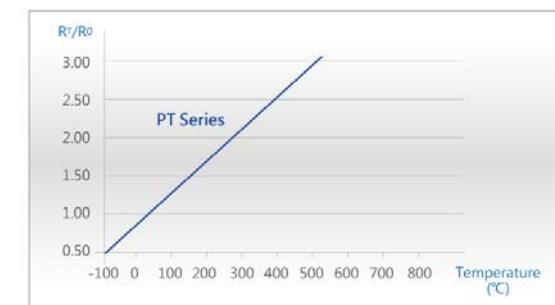

$$R_T = R_0 \times (1 + A T + B T^2)$$

R<sub>T</sub>: Resistance as a function of temperature  
R<sub>0</sub>: Resistance at 0°C  
T: Temperature in °C  
A = 3.9083 × 10<sup>-3</sup> °C<sup>-1</sup>  
B = -5.775 × 10<sup>-7</sup> °C<sup>-2</sup>  
C = -4.183 × 10<sup>-12</sup> °C<sup>-3</sup>

### Tolerance Classes:

The temperature sensors are divided into classes according to their limit deviations:

Class A:	$\Delta T \pm (0.15 + 0.002 \times T)$
Class B:	$\Delta T \pm (0.30 + 0.005 \times T)$

## PT SENSOR ( RTD SENSOR )

### Description :

Resistance Temperature Detectors (RTDs) are temperature sensors that contain a resistor that changes resistance value as its temperature changes. They have been used for many years to measure temperature in laboratory and industrial processes, and have developed a reputation for accuracy, repeatability, and stability.

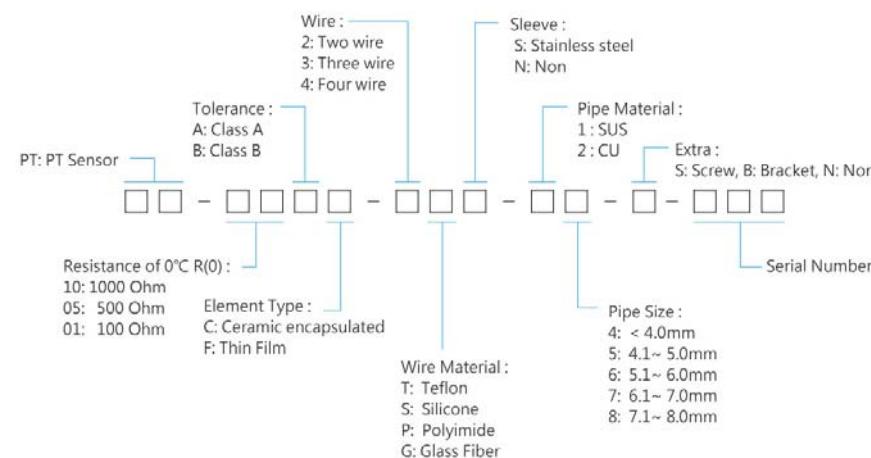

### Feature :

- A wide temperature range (approximately -200 to 850°C)
- Good accuracy (better than thermocouples)
- Good interchangeability
- Long-term stability

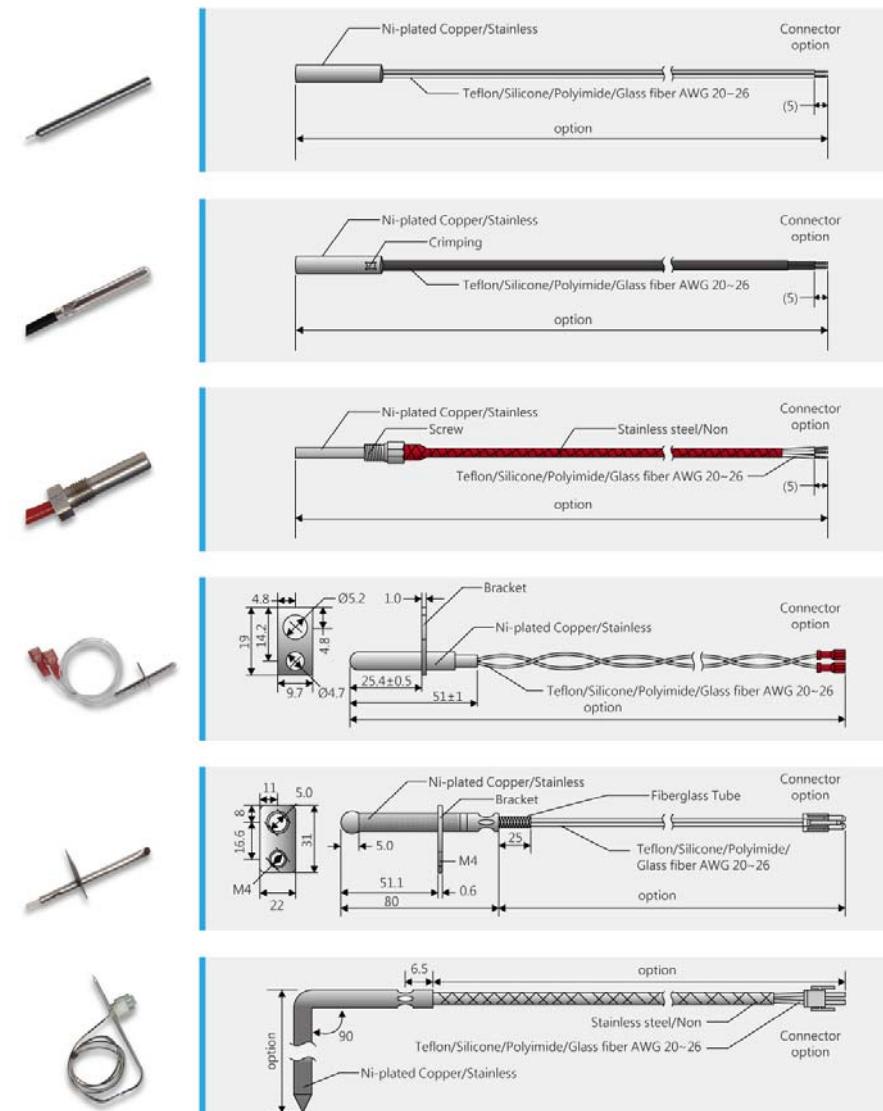

With a temperature range up to 850°C, RTDs can be used in all but the highest-temperature industrial processes. When made using metals such as platinum, they are very stable and are not affected by corrosion or oxidation.

Other materials such as nickel, copper, and nickel-ironalloy have also been used for RTDs. However, these materials are not commonly used since they have lower temperature capabilities and are not as stable or repeatable as platinum.

### RTD Sensors Coding System

## APPLICATION

Besides The Above Standard Characteristic Product, We Have Some Special Types And Can Provide The Flexible Design According To Your Needs As Well.

## SILICON TEMPERATURE SENSORS

The silicon temperature sensors have a positive temperature coefficient of resistance and are suitable for use in measurement and control systems.

Silicon sensors have a positive temperature coefficient and in opposite to the PTC's an approximate linear temperature characteristic. The resistance behaviour is comparable with this of a measurement resistor with a very big temperature coefficient. The main area of application of the silicon sensors is the temperature measurement and the monitoring of limit values in the field of

\*industrial measuring technique / motor protection

\*automobile technique

\*medicine electronic

KTY sensors display a virtually linear temperature coefficient over their entire temperature range, ensuring highly accurate measurements. A linearization resistor can be easily added where further linearization is required. As the temperature coefficient is positive, the sensors exhibit fail-safe operation when a system overheats. Furthermore silicon is inherently stable, so KTY sensors are extremely reliable and have very long operational lifetimes.

$$R_T = R_{25} \times (1 + \alpha \times \Delta T_A + \beta \times \Delta T_A^2) = f(T_A)$$

with:  $\alpha = 7.88 \times 10^{-3} K^{-1}$ ;  $\beta = 1.937 \times 10^{-5} K^{-2}$

The temperature factor kT can be derived from this :

$$k_T = \frac{R_T}{R_{25}} = (1 + \alpha \times \Delta T_A + \beta \times \Delta T_A^2) = f(T_A)$$

The temperature at the sensor can be calculated from the change in the sensors resistance from the following equation, which approximates the characteristic curve

$$T = (25 + \frac{\sqrt{\alpha^2 - 4 \times \beta + 4 \times \beta \times k_T - \alpha}}{2 \times \beta}) ^\circ C$$

## KTY SENSOR

### Description :

Silicon Temperature Sensors are designed for the measurement, control and regulation of air, gases and liquids within the temperature range of -50°C to +150°C.

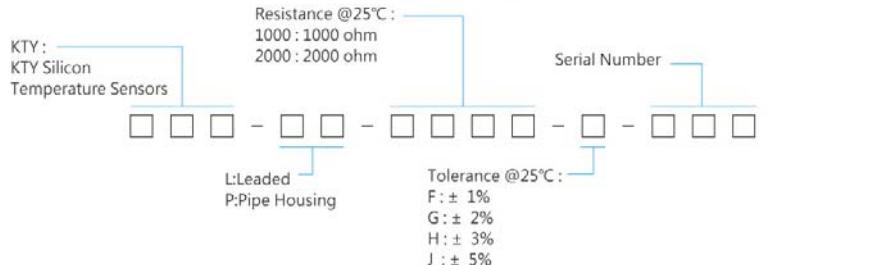

The temperature sensing element is an n-conducting (N type) silicon crystal in planar technology.

The resistance of the sensor can be calculated for various temperatures from the following second order equation, valid over the temperature range -30°C to +130°C

### Feature :

- Temperature dependent resistor with positive temperature coefficient
- Temperature range : -50°C to +150°C
- Available in SMD or leaded or customized packages
- Linear output
- Excellent long term stability
- Polarity independent due to symmetrical construction
- Fast response time
- Resistance tolerances (R25) of +/-3% or +/-1%

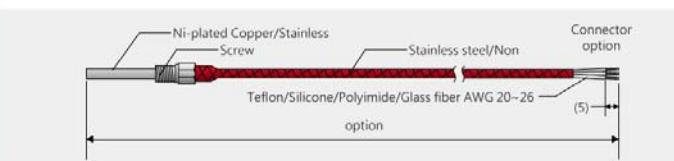

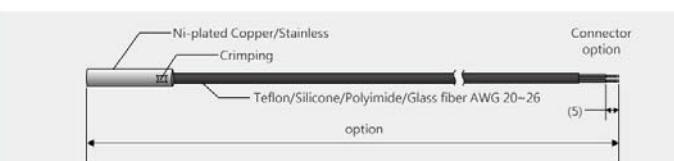

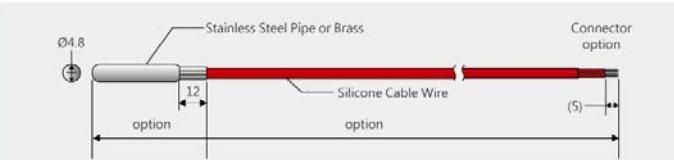

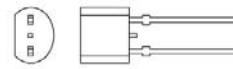

### KTY Silicon Temperature Sensors Coding System

Family	Package	R (Ohms)	Available Tolerances	Operator Temp. Range
KTY-1	SOD70	1000/2000	±5%~±1%	-55~150°C
KTY-2	SOT23	1000/2000	±5%~±1%	-55~150°C
KTY-3	SOD68	1000	±5%~±1%	-55~175°C
KTY-4	SOD68H	1000(R <sub>100</sub> )	±5%~±3%	-40~300°C
KTY-5	SOD80	1000	±5%~±1%	-40~125°C
KTY-6	TO92	1000/2000	±5%~±1%	-50~150°C
KTY-7	TO92 Mini	1000/2000	±5%~±1%	-50~150°C

## APPLICATION

Besides The Above Standard Characteristic Product, We Have Some Special Types And Can Provide The Flexible Design According To Your Needs As Well.

**KTY R/T TABLE**

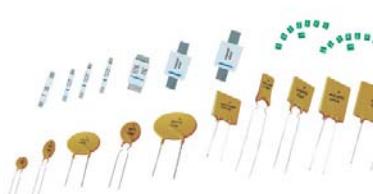

Temp(°C)	Resistance at 25°C		Temperature Deviation (°C)
	(Ω)	2000	1000

**OTHER PRODUCT****Inrush Current Limiting Thermistor Series**

Product No. : 11P

**Description :**

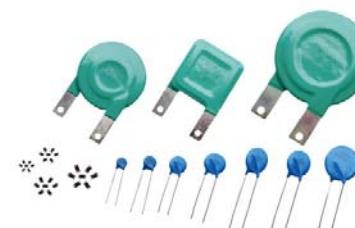

- High inrush current restriction effect
- High thermal and electrical stability
- Operating temperature range from -40°C to +180°C
- Resistance tolerances : ±10%, ±15% and ±20% on R25 values
- Body size : 5φ,8φ,10φ,13φ,15φ,20φ,25φ,30φ

**PPTC Series**

Product No. : 12

**Description :**

- Resettable fuses are made of patented novel polymeric PTC material
- Suitable for wide variety of electronic equipment
- Available with a wide operating voltage and excellent stability

**Zinc Oxide Varistor Series**

Product No. : 13R

**Description :**

- Varistor with fast response to the rapidly rising surge voltage
- Element dia. : 5φ,7φ,10φ,14φ,20φ,25φ,32φ,40φ,53φ
- Varistor voltage: 18V-1800V
- Max. peak current: 100A ~ 70KA

## OTHER PRODUCT

### Gas Discharge Tube Series

Product No.: 13GACPA

Description :

- Temperature Rating: Storage : -40°C to + 115°C
- Operate : -30°C to + 85°C
- Series: 2 elements / 3 elements / SMD / Chip SMD
- Reliable,approved by UL

### Thermal Cutoffs & Joiner Series

Product No.: 14

Description :

- Extremely sensitive to ambient temperature
- Precise and stable functioning characteristic
- Compact,epoxy-sealed construction
- Reliable,approved by various international standards (UL/CSA/VDE/TUE/TUV/CCC/PSE/MITI)

### Thermostats Series

Product No.: 15

Description :

- Snap-action , automatic reset bimetal
- Operating temperature : 65~185°C
- Temperature tolerance : ±5°C
- Electrical rating : 22A/115VAC, 8A/277VAC, 20A/16VDC
